

## Virginia Weatherization Program Application For Services

---

# Don't Delay... Weatherize Today!

### What is weatherization?

Weatherization reduces energy costs for families by improving the efficiency of their homes, while also assessing and eliminating related health and safety issues.

Community Housing Partners' Weatherization program is designed to lower monthly fuel costs by making a home more fuel efficient, and to make homes safer and more comfortable at no cost to the client.

Energy improvements are based on a site-specific energy audit as approved by the Department of Housing and Community Development and may include:

- Monitoring and remedy of unsafe conditions (carbon monoxide emissions, back draft conditions, fire hazards, and bad wiring)
- Diagnostic tests to evaluate areas of heat loss
- Inspection, replacement, or repair and installation as needed of attic and wall insulation, caulking around windows, weather-stripping of doors, and other measures to prevent heat loss
- Indoor air quality checks
- Inspection of heating equipment for safe and efficient operation and insulation of hot water heaters and pipe to prevent frozen pipe ruptures

### How does it work?

Weatherization measures are delivered to single-family and mobile homes. Our Weatherization technicians use energy audits to determine which energy efficiency measures are most appropriate and cost-effective for each home.

### How much does it cost?

Nothing. Weatherization is a FREE service for qualified applicants.

### When can it be done?

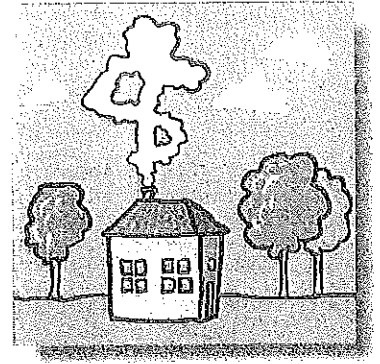

Weatherization services can be performed **any time of the year**. **Don't wait until the weather cools down** to have your heating checked, or you may risk being put on a waiting list for our services. Effective air sealing and insulation may also dramatically reduce your home's heat build-up on those hot summer days, so contact CHP **today** to improve your family's comfort and beat the rush next winter!

# Free Weatherization

## Attention Homeowners & Renters:

If you qualify as a low-to moderate-income household, we can **help reduce your energy bills**, and make your home more comfortable and

affordable year round!

Clients approved for the Weatherization Assistance Program will receive a **free energy audit**. This will determine the work that can be done to your home. This may include:

- Energy saving measures to reduce heat loss, such as attic and wall insulation, caulking and weather-stripping
- Inspection of heating equipment and duct work in order to assure safe and efficient operation
- Assessment and remedy of unsafe conditions (Carbon monoxide emissions, back-draft conditions, fire hazards, bad wiring, etc.)
- Other energy-related improvements
